

CURRICULUM VITAE	
Athens 2025	
GEORGAKIS DIMITRIS	
Electrical Engineering NTUA	
Telephone:	6977259935
Date of birth:	04.11.1970
Marital status:	Married with two children
Nationality:	Greek
e-mail:	d.georgakis@powerserv.gr
Member of the Technical Chamber of Greece:	1995 (R.N.: 70989)
Education	
1995 National Technical University of Athens (NTUA) Master Degree on Science in Electrical Engineering	
Attended Seminars	
2020 Certified Seminar “Basic Safety Training” (GWO-Global Wind Organization) by GEP Training Center (Working at Height, First Aid, Manual Handling& Fire Awareness total 40 hours) 2017 KNX- Building Automation Standard, Extreme Advanced Course by Certified Training Center (40 hours) - KNX Association Partner No13132. 2016 Certified Seminar “Headquarters of Energy Management Systems (ISO 50001) by TUV Austria Academy (40 hours) 2010 Seminar on KNX technology «Home and building control system» by Schneider Electric (40 hours) 2009 «Technical safety» seminar at the Greek Institute for Hygiene and Safety (100 hours) 1999 «New technics in Electrical Installations - INSTABUS EIB» organized by SIEMENS' Certified Training Center) 1996 «Programmable Controllers (PLC) SIMATIC S5 – Basic Cycle» organized by SIEMENS A.E.) 1995 «ORACLE's Database Management System and development tools» organized by ORACLE HELLAS.) 1995 «ORACLE's Database Management System» organized by the Continuing Education Department of the NTUA.)	
Languages	
▪ English (Fair knowledge with fluent technical terminology) ▪ Greek (Mother tongue)	
Research & Educational Activities	
1999-2002 Participation in Research Program «Autonomous Desalination System by Distillation», (2 years' duration) financed by European Union. Under this program a prototype system of desalination by distillation was developed (Agrinio, Greece) which operates independently with the help of solar collectors and photovoltaics.	
2003-2010 Participation in Research Program «Microgrids» financed by European Union. Under this program a prototype laboratory microgrid was developed, which feed local loads and includes a photovoltaic generator, wind generator, energy storage with batteries and	

interface with the electricity network.

2004-2007

Participation in Research Program "Floating independent ecological and efficient desalination unit, (3 years' duration), financed by General Secretariat for Research and Technology (GSRT). Under this program a desalination system will be implemented in conjunction with wind, a floating structure. The program was in the design phase. The unit was installed at Iraklia island under another financed program.

2003-2004

Participation in supervision at laboratory exercises in Laboratory Department of the NTUA School of Electrical and Computer Engineering, within the courses «Industrial Electronics» of 5th semester and «Electrical Engines I» of 7th semester

2005

Participation in the Conference «Power Electronics Specialists Conference- PESC 2005» within which the research « **Modeling and Control of a Small Scale Grid-connected PEM Fuel Cell System**» was published and presented by a representative.

2004

Participation in the Conference «Power Electronics Specialists Conference- PESC 2004» within which the research «**Operation of a prototype Microgrid system based on micro-sources equipped with fast-acting power electronics interfaces**» was presented and published

PROFESSIONAL EXPERIENCE

Position and Main Discipline: Electrical & Mechanical Engineer

2015-Today:

“PowerServ Ltd” Engineering Consulting Company

Member

Participation in the design of the following projects:

PROMETHAN (2024-2025): DETAILED ENGINEERING, PROCUREMENT AND CONSTRUCTION OF THE PERDIKAS PERMANENT METERING/ REGULATING STATION- Engineering studies were conducted for the instrumentation, piping, and process systems

FARAN S.A. (2024-2025): New Sterile Injectables Facility (Studies for Permit, Basic & Detail Design)

PROMITHEAS ATEBE (2024-2025): Construction of a double bioclimatic nursery

Energy and functional upgrade and renovation of the Health Centers (HC) of Konitsa and Metsovo (2024-2025) - Electromechanical Studies

Energy and functional upgrade and renovation of the Health Centers (HC) of Amfilochia,

Ano Kalentini, and Vourgareli (2024-2025) – Electromechanical Studies

DESFA (2024-2025): BASIC DESIGN FOR THE EXPANSION AND UPGRADE OF M/R STATIONS OF EXIT POINT TO DISTRIBUTION NETWORK “ATHENS” - The instrumentation, piping, and process systems underwent a comprehensive upgrade

"Preparation of a study for the replacement of the conventional lighting of the SNFCC facilities with new LED-type lighting." (2024)

«CONSULTANCY SERVICES FOR FEASIBILITY STUDIES AND DETAILED DESIGN OF CLIMATE CHANGE RESILIENT SOLID WASTE MANAGEMENT SYSTEMS IN THE LILONGWE CITY, MALAWI» (2024) - Electromechanical Studies

NEW FUEL STORAGE TANK TK5 (2023-2025) – Instrumentation and Electrical Studies

CONSTRUCTION OF THE NEW HERAKLION INTERNATIONAL AIRPORT IN CRETE AND ITS ROAD CONNECTIONS (2023-2025).

Design of the medium voltage network and substations.

Electrical Studies for:

- Ground Transportation HUB
- Main Terminal Building
- Tower Control Building
- Parking Area
- Sewage Treatment Plant

PROMETHAN S.A. (2023-2025): «PROCUREMENT AND INSTALLATION OF KORINTHOS METERING /REGULATING STATION» for Electromechanical Studies

VIOTI PHARMACEUTICALS S.A. (2023-2024): NEW INDUSTRIAL UNIT

PHARMATHEN (2023): New Ophthalmic Plant

FULL SUPPLY AND INSTALLATION OF EQUIPMENT FOR THE H2 INNOVATION HUB (H2-HUB) (2022-2025) – Electromechanical studies and Process

MUNICIPALITY OF IOANNINA CITY (2022-2024): Construction of a Municipal Building with a Multi-Purpose Area at «ΔΟΜΠΟΛΗ» Building

ALMARIET (2022): Preparation of a grid connection terms study for a 20 MW photovoltaic (PV) power plant in Vonitsa

NESTLE ATHENS OFFICES (2022): As Build Drawings

VIVA WALLET (2022): Interior Layout in office buildings, roof configuration, pergola construction on the roof, and an entrance canopy

VENTAVEL S.A. (2021): Technical inspection of a 34 MW Wind Farm at the 'Melia' location, Siatista, Kozani region

PHOTOVOLTAIC ENERGY (2021): Development of electromechanical design studies and detailed drawings for the buildings of the photovoltaic step-up substation at Vathylakkos, Kozani.

Contract for the assignment of electrical engineering design services for the permitting of four wind farms with a total installed capacity of 300 MW at the locations: 'Almyres–Pagos', 'Fylakes–Aetos–Mavra Chomata', 'Trani Rachi–Chersos Lofos–Pigadia', and 'Lagos–Pyrgos Alonia' in the Regional Unit of Evros (2021)

VATORA ENERGY S.A. (2020): Engineering, construction, and operation of a 30 MW Wind Farm at the 'Lykotrypes' location, Municipality of Antirrio, Aetolia-Acarnania.

Olympic Fuel Company S.A. (2020): Electrical design services for the project of “Revamp of Aviation Fuel Receipt Piping System”

PPC-Renewables (2020): Inspection of the Wind Park of Andros for TUV Austria (1,57MW)

LPC S.A. (2019-2020): Services for the preparation of electromechanical studies and supervision, including the interconnection through piping with the existing pumping station of the facility for tanker loading at Aspropyrgos, Attica.

AKTOR - J & P AVAX S.A. (2019-2020): Services for the preparation of design studies and supervision for the DESFA S.A. project: Detailed design of metering stations U2220 and U2240 in Thessaloniki.

Motor Oil Hellas (2019): Electrical and Mechanical design services for the project of “Installation of Compressed Natural Gas Filling Station”

CORAL S.A. (2019): Electrical and Mechanical design services for the project of “Kalohori Terminal Upgrading

Vector Engineers SA (2019): As member of the Vector's design team, participation in the construction of the parts of A and D of the building complex “*Piraeus Port Plaza 3*”

- Also participation in the design of the electrical installation of a new residence in Psychiko as a pilot smart and green building.

Arinomario S.A (2018-2019): Engineering, Construction, Operation, and Maintenance of a 12.8 MW Wind Farm at the 'Profitis Ilias' location, Municipality of Alexandroupoli, Thrace

Energiaki Kykladon Limited Liability Company (2018-2019): Construction of a Wind Farm at the 'Tragoudistis' location, Sifnos Island, Cyclades

Motor Oil Hellas (2018): Electrical and Mechanical design services for the project of “Construction of a new Tank Farm at Bromopigado area”

Construction of a 90 MW Wind Farm in the Azov area, Russia (2017-2020).

AKTOR S.A. (2017-2019): Engineering, Construction, Operation, and Maintenance of a 24 MW Wind Farm at the 'Gavrovo' location, Municipality of Amfilochia, Aetolia-Acarnania.

DOMOS FERON S.A. (2017-2018): Services for the preparation of studies and supervision during the construction of the new quay at Piraeus for PPA S.A., covering the loading and unloading berth area serving the facilities of CORAL, AVIN, and JETOIL.

AEGEAN S.A. (2017-2018): Services for the preparation of detailed design studies for the New Tank Farm for Ballast Treatment project in Drapetsona.

VIOPAR ENERGY S.A. (2017): Consulting services for the project of "Construction a Biomass Power Plant 5MW production of electricity at Volos".

Engineering, Construction, Operation, and Maintenance of a 50 MW Wind Farm at the 'Kasidiaris (2016-2020)-I' location, Municipality of Pogoni - Zitsa, Epirus Region (currently under construction).

DOMOS FERON S.A. (2016): Electrical and Mechanical design services for the project of "Construction of the new Oil Terminal of Piraeus for PPA S.A. and for the ship loading and unloading facilities of CORAL, AVIN, JETOIL.

Ergotem S.A. (2016): Electrical and Mechanical design services for the project of "Construction of Fuel Storage Facilities in Camp Lemonier, Djibouti, Africa, for US NAVAF C"

ELINOIL Hellenic Petroleum Company S.A. (2016): Electrical and Mechanical design services for the project of "Construction of a (1) new pumpstation and its interconnection through pipelines 8 " - 6 " - 10 " with the existing tanks of the facility for the loading of tankers in Agria Volos".

ELINOIL Hellenic Petroleum Company S.A. (2016): Electrical and Mechanical design services for the project of "Construction of 3 new tanks (1000 m3 each) and their interconnection through pipelines 8 " - 6 " - 10 " with the existing pumpstation of the installation for the loading of tankers in Aspropyrgos Attica".

DEI S.A. (2015-2016): Development of electromechanical and automation design studies for a 45 MWth thermal capacity project at the Agios Dimitrios Power Plant, Kozani.

PPC – Public Power Company (2015): Electrical and Mechanical design services for the project of "Aghios Dimitrios SES design, supply, installation and putting into operation of two (2) thermal power transfer systems to convey 45MWwth per unit from the already installed flue gas-water heat exchangers in Units I and II to the already installed FGHRs in units III and IV of Aghios Dimitrios SES for condensate preheating in Units III and IV, respectively".

J & P AVAX A.E.(2015) : Electrical and Mechanical design services for the project of "Detail Design Vitol Tank Terminal Vassilikos (VTTV), Cyprus".

AEGEAN A.E.(2015): Electrical and Mechanical design services for the project of “Detail Design of New Tank Farm of Ballast Treatment at Drapetsona”.

METKA S.A. (2014-2020): Provision of study preparation services for the following projects:

- Open Cycle Power Plant, 600 MW, Hassi R'Mel, Algeria
- Samra Power Station – Phase III Add-On Combined Cycle Project
- Open Cycle Power Plant, 1250 MW, Al Basra, Iraq
- Combined Cycle Power Plant, 775 MW, Denizli, Turkey
- Combined Cycle Power Plant, 870 MW, Samsun, Turkey

CORAL S.A. (2014-2015): Development of electromechanical and automation design studies for the upgrade of crude oil (heavy fuel oil) storage tanks in Perama.

J&P AVAX S.A. (2013-2024): Services for the preparation of detailed design studies for the Vitol Tank Terminal Vassilikos (VTTV) project in Cyprus

MALLIONTA (2013-2014): Development of electromechanical and automation design studies for the project 'Maintenance and Modification of Electromechanical Installations at Soroni Power Plant

BCI Renewables (2012): Development of the design study for the 1.5 MW PV installation in the Cherso region, Kilkis

BCI Renewables (2012): Development of the design study for the 2 MW PV installation in the Kalentzi region, Karditsa.

In the context of these projects there was responsibility for the design of the electrical, instrumentation and control systems.

2019-2022:

“TUV AUSTRIA HELLAS Ltd”

External Inspector of Industrial Services Division

2010-2018

“PROMITHEAS SA” Construction Company

External Partner

Responsibilities including:

Energy inspections and energy studies.

Studies of photovoltaic and renewable energy systems. Also including the control of the market and the proper material selection. Finally, the feasibility study, strategic planning and proactive study for the licensing of photovoltaic and renewable systems for investors.

2000-2017

“OLYMPIC ATHLETIC CENTER OF ATHENS”

Electrical & Mechanical Department

Senior Electrical Engineer for the Electrical & Mechanical installations of one of the biggest athletic complex in the world. Also Complex's Energy Manager.

Responsibilities including the maintenance, operation and development / expansion of the OACA's facilities.

The Olympic complex has a wide network of 21 Medium Voltage substations (total installed power 90MW), a boiler room of 18MW, Heat Pumps with total power bigger than 30MW (thermal and cooling) and of course a wide range of electrical and mechanical installations - such as plant fuel, lighting, pumping systems, hydraulics, heating and cooling systems, automation, BMS, swimming pools systems, backup systems (generators, UPS), etc.

2015-2018

Participation in the inspection team for the "*LDK Consultants*" (with visit site), in order to prepare MEP (Mechanical Electrical and Plumbing) Due Diligence report for large building facilities :

- MEP Due Diligence report for the "Le Meridien" Hotel at Amman, Jordan (2018)
- MEP Due Diligence report for the "Tribe" Hotel at Nairobi, Kenya (2015)
- MEP Due Diligence report for the "Sarit" Mall-Shopping Center at Nairobi, Kenya (2016)
- MEP Due Diligence report for the "Imperial" Building at Nairobi, Kenya (2017)

2013

Participation in the electrical Design of three Photovoltaic Park for *BCI Renewables SA*

- Kilkis, Hersou, 1.5MW
- Chalkidiki, Kalikratia, 2x 500kW
- Karditsa, Kalentzi, 2MW

1999

Telematic Network office of the Agricultural University of Athens

Worked as a Network Engineer. Responsibilities Including Object maintenance and development of hardware and software equipment of the network of the University.

1998-1999

"SCIENTIFIC ENTERPRISE Ltd".

Responsibilities including design and measuring systems installation, datalogger programming, design and repair of electronic boards. Within this framework I participated in building and maintaining vast network of meteorological stations of the Ministry of Agriculture, also measuring systems for the Environmental Pollution Control Program Athens and numerous workshops at the University of Athens, Agricultural University and the School of Surveying NTUA. Also, I participated in the design and construction of the educational system for school laboratories of the Public Employment of Greece, INSTABUS EIB

1996-1997

"ATEMKE SA" Construction Company

Worksite Construction of Highway-Motorist's Center SEIRIOS (43rd km of Athens – Thessaloniki National Highway) – Supervision of Construction of the Electronical & Mechanical Installations of the building

1995-1996

“ATEMKE SA” Construction Company

IT Department – Responsibilities including application design, support and development with the ORACLE 6 (UNIX) Management System Database. Also, the support of all software packages used by the accounting, technical and commercial department of the company.
